General

Combined game shooting is a discipline that combines shooting at clay targets with ashotgun and shooting at fixed paper game targets and at a running boar with a rifle. It is designed to test the skills of an all-round game shooter. The clay target competitions take place on a Game Trench and a Game Compak® ranges, while the game rifle shooting is organised on a shooting range at 100 metres for the fixed paper game targets and at 50 metres for the running boar.

The conditions defined by these rules are the ones required for international competitions.

Each shooter attending the competition will sign a declaration in which he states that he has read and accepted the present rules.

1. INSTALLATIONS

1.1 Shooting range

1.1.1 Game Trench

The five shooting stands are formed by one-metre squares, two to three metres apart (measured from the centre) and eleven metres behind the front line of the trap machine(s).

1.1.2 Game Compak®

The terrain is delimited by an obligatory rectangular fly over zone for the targets, of 35m minimum and 40m maximum in width, and 25m depth (see diagram below).

This zone is identified on the ground by four stakes roughly 50cm high, holding a flag or any other type of visible marker, in order to facilitate the work of laying out the trajectories and theshooters' control. The sides, starting from the left and moving in a clockwise direction are: AB-BC-CD-DA.

01/01/2024 5 / 31

The five shooting positions are made as 1m squares, aligned with a distance of 2 to 5 meters between their centers.

The line joining the front of the five shooting positions must be situated between 4 and 8 meters back from and parallel to the line AD of the rectangle.

Station N°3 must be centered on the base of the AD rectangle.

Firing Angle Limiters (F.A.L.) must be erected at each shooting position, to guarantee generalsafety.

These F.A.L. are of this advised model (see below), they must:

- Efficiently limit the shooting angle to the sides,
- Efficiently limit the vertical shooting angle,
- Prevent shooters from advancing their body ahead of the shooting position.

Shooting position in coloured 50mm diameter PVC tubes
Straight tubes + interlocking elbows.
All of the lower part to be filled with water
or sand or fixed to the ground.

The installation uses six machines, they can be manual, semi-automatic or automatic.

They must be given letters (A, B, C, D, etc.) or numbers (1, 2, 3, 4, etc.) from left to right, and each position must be clearly indicated by a board showing the corresponding letter or number. 2 series of 25 targets will be shot on 2 Game Compak. 1 series will be shot with 1 simultaneous double on each shooting position, and the other series will be shot with one double on report on each shooting position.

01/01/2024 6 / 31

1.1.3 Game Rifle

The shooting ranges must comply with the laws applying in each country concerned. Each shooting range must be equipped with embankments, gantries, cap, etc to ensure that projectiles are confined within the shooting zone.

The fixed targets will be positioned 100 metres away on a cable return device, mechanical device or with an electronic reader system. The running boars will be shot from 50 metres, from left to right and from right to left with a ten-metre shooting window. The speed will be adjusted so that the target is visible for 2.5 seconds, both from left to right and from right to left.

1.2 Traps

Game Trench takes place on an installation fitted with either:

- five traps,
- or fifteen traps using only the sixth, seventh, eighth, ninth and tenth traps,
- or only one trap with vertical and horizontal variation.

The Game Compak® is fitted with six traps.

1.3 Trap devices

1.3.1 Game Trench

The traps can be controlled by a "sonopull" voice activated device (electrical or electronic), with a scrambler so that all the shooters are offered the same clay target targets in a different order without knowing which of the five traps will launch the clay target, by an electronic remote control or manually.

1.3.2 Game Compak®

The traps can be triggered either manually, via a remote control system, or using a sonopull type system.

In the cases of manual or remote control systems, the target must be released within in a time lapse of 0 to 3 seconds after the shooter's call.

In the case of sonopull, the target must be released within in a time lapse of 0.5 second after the shooter's call.

1.4 Trajectories

1.4.1 Game Trench

It must be possible to modify the trajectories of the clay target targets launched by a Game Trench in order to vary the shooting conditions. The clay target trajectory is sixty metres, plus or minus five metres, with a maximum angle of 35° (thirty-five degrees) on the left and right of the installation axis. Three official schemes have been defined to make these adjustments (see Article 17.1). The launched clay target targets must have a trajectory with zero wind in accordance with the official shooting schemes. This distance will be measured from the edge of the trench irrespective of the direction. If a trench fitted with a single trap with angle variations, solely the limit data are taken into consideration (angles and height).

A round comprises 25 clay targets and it must be possible to fire two cartridges at each clay target.

1.4.2 Game Compak®

Trajectories (see appendix 1 - the plan of the installations)

01/01/2024 7 / 31

They must be as varied as possible:

Rising, falling, receding, approaching, lofted, rabbit, etc.

It must be possible to shoot twice at each single target from each of the five shooting stands, in full safety for the shooters, the referees, the staff and the spectators.

A Game Compak® competition includes two types of trajectories: Compulsory trajectories:

- A trajectory from left to right crossing sides AB and CD.
- A trajectory from right to left crossing sides CD and AB.
- A receding trajectory crossing side BC
- A rabbit from left to right or from right to left on one competition.

Free trajectories:

These are determined by the organizer, and depending on the lie of the land.

The trap installations can be of two types:

- 1) Either a trench installation in front of the shooting stands,
- 2) Or a raised installation behind the shooting stands.

1.4.3 Menu or order of firing at the targets

The firing menus are stationed at each stand, in such a way that the shooter can read them easily.

The single targets and doubles on the menus can be selected in any order for the machines by the course designer.

2. CLAY TARGETS AND PAPER GAME TARGETS

2.1 Definitions

2.1.1 Single clay target (Game Trench and Game Compak®):

A single clay target launched after the shooter's command in accordance with the present rules and according to the scheme selected.

2.1.2 Double on report (Game Compak®):

Two clay targets from one or two traps, the first called by the shooter and the second released on the shot of the first clay target (on report) within 0 to 3 seconds delay for the second clay target, plus any time needed for it to appear).

No doubles on report will be sighted. Only clay targets that have already been shot as singles may be launched in the doubles. Two cartridges may be shot at the same clay target.

2.1.3 Simultaneous doubles (Game Compak®):

Two clay targets launched at the same time by one or two traps. In this case sighters are shown. The targets may be shot in any order. Two cartridges may be shot at the same clay target.

At each stand, shooters will shoot (see Article 17.2) three single clay targets and one on report or simultaneous double.

2.1.4 Game Rifle shooting targets:

The four paper game targets used, shot at 100 (one hundred) meters, will be the DJV type, positioned at least one meter apart, while the running boar will have a standard DJV target

measuring with two heads (cf. Appendix 4 • paper game target drawings).

Organizers can use replaceable target centers (mirrors) including at least the 10, 9, 8 rings but one referee must be always present during target substitution. Every hit outside of the mirror inside the score zone will be added at the score. On the mirror center must be indicated by the referee the number of shots that were out of the mirror itself with their score. These holes must then been hidden by means of an adhesive stick.

The use of mirrors must be adopted for all targets in a given competition and for all shooters uniformly.

2.2 Single clay targets (Game Trench and Game Compak®):

All types of clay targets are permitted for competitions. The clay target colours must be chosen so that they stand out clearly against the background.

2.2.1 Clay target counted good

A clay target is called "good" when it has been launched and shot in accordance with the rules and at least one piece visibly breaks off. This also applies to flash clay targets.

Two cartridges may be fired at the same clay target. The referee must call the clay target "no bird" if both shots are fired simultaneously.

2.2.2 Clay target counted zero

A clay target is called "zero" when it has been launched and shot in accordance with the rules and no pieces visibly break off.

Zeros must be called by the referee loudly and clearly or using any other means audible to the shooters so that they can protest immediately where appropriate.

2.3 Double on report (Game Compak®)

2.3.1 Good/good doubles

Good/good in the doubles occur when two clay targets have been launched and the shooter has shot them in accordance with Article 2.1.1. If both clay targets in a double are broken by a single shot, they are both counted "good" and "good".

2.3.2 Good/zero, zero/good and zero/zero doubles

Zeros must be called by the referee loudly and clearly or using any other means audible to the shooters so that they can protest immediately where appropriate.

If the shooter does not fire at the second clay target of a regular double, the result of the shot at the first clay target is recorded and the second one is called "zero". If the shooter does not fire at the first clay target because of being taken by surprise or because the shooter did not see it, the result of the first clay target will stand as "zero and no bird". Since the second clay target cannot be released until the shot is fired, the double will be repeated until the result for the second clay target is known. When a shooter in a double fires both shots at the same clay target, the result is recorded and the clay target not hit is counted "zero".

2.4 Simultaneous doubles (Game Compak®)

2.4.1 Good/good doubles

Good/good doubles occur when two clay targets have been launched and the shooter has shot them in accordance with Article 2.1.1. If both clay targets in a simultaneous double are broken by a single shot, they are both counted "good" and "good".

2.4.2 Good/zero, zero/good and zero/zero doubles

Zeros must be called by the referee loudly and clearly or using any other means audible to the shooters so that they can protest immediately where appropriate.

If the shooter does not shoot a regular double without a legitimate reason, both clay targets are called "zero".

2.5 "NO BIRD" regarding Game Trench and Game Compak®

Every clay target has to be shot. If the referee considers that the clay target hasn't been regularly launched, he may announce "No bird" and have it launched again.

2.5.1 "NO BIRD" due to the weapon or ammunition

Defect	Туре	Action							
Two shotsat	At a single clay target (*)	«No Bird», clay target to be repeated							
the same time	At the first clay target of a double on report	«No Bird», double to be repeated							
(double	At a simultaneous double	«No Bird», double to be repeated							
discharge)	At a rafale double	«No Bird», double to be repeated							
Malfunation	At a single clay target (*)	«No Bird», clay target to be repeated							
Malfunction	At a double on report	«No Bird», double to be repeated							
with the first shot	At a simultaneous double	«No Bird», double to be repeated							
IIISt SHOt	At a rafale double	«No Bird», double to be repeated							
Malfunction with the	At a single clay target (*)	«No Bird», clay target to be repeated The clay target can be broken only with the second shot and is counted zero if broken with the first shot.							
second shot	At a double on report	«No Bird», double to be repeated. Result of the first shot recorded.							
	At a simultaneous double	«No Bird», double to be repeated							
	At a rafale double	«No Bird», double to be repeated							

^(*) Also to be applied to Game Trench

2.5.2 «NO BIRD» due to the clay target

The table below applies in the following cases:

- if a broken clay target is thrown;
- if the clay target is not thrown from the correct trap;
- if two clay targets are launched from traps on the same shooting stand;
- if the clay target is not of the correct colour, size or type;
- if the trajectory is ruled incorrect by the referee;
- if the clay target is thrown more than three seconds after the referee's command;
- if the shooter has not called for the clay target;
- if the referee rules that the shooter has clearly been disturbed;
- if the referee is unable to give a ruling on the clay target.

Туре	Action
Single clay target (*)	«No Bird», clay target to be repeated
Rabbit broken after being missed with the first shot and before the second shot	«No Bird», rabbit to be repeated The clay target can be broken only with the second shot and is counted zero ifbroken with the first shot.
First clay target of a double on report	«No Bird», double to be repeated

Double on report if the first target (or pieces of it) break(s) the second one before the shooter has fired the second shot	«No Bird», double to be repeated Result of the first target recorded.
Second clay target of a double on report	«No Bird», double to be repeated Result of the first Shot recorded.
Simultaneous double target	«No Bird», double to be repeated
Rafale double target	«No Bird», double to be repeated

^(*) Also to be applied to Game Trench

2.5.3 Bad weather

There aren't any « no birds » due to the bad weather.

In all other cases, every broken clay target is counted "good" and every missed clay target is counted "zero".

On no account, a clay target is shot after the referee clearly announced "no bird".

3. SHOOTING A ROUND

3.1 Definition of a round

3.1.1 Game shotgun shooting

Each round comprises 25 clay targets.

3.1.2 Game Rifle shooting

A round comprises four series (each 5 minutes) of five bullets at four targets. The running boar will be shot 3 times from left to right and twice from right to left or vice versa twice from left to right and 3 times from right to left at shooter's choice.

3.2 Shooting squads

Shooting squads are formed by six shooters for all disciplines.

3.3 Weapon testing

3.3.1 Game shotgun shooting

Weapon testing is authorised solely at a stand designed or this purpose and made secure on the organiser's responsibility.

3.3.2 Game Rifle shooting

Weapon testing is authorised solely at a stand designed or this purpose and made secure on the organiser's responsibility.

3.4 Shooting position

3.4.1 Game shotgun shooting

Shooting takes place in the standing position. Shooters must position their feet within the limits of the shooting stand.

3.4.2 Game Rifle shooting

The position depends on the target:

1. The deer target is shot in the standing position, with the weapon resting on one side of the 01/01/2024

post.

- 2. The sitting fox target is shot in the prone position, 2 arms on the ground. The arm supporting the front part of the rifle must rest on the elbow.
- 3. The chamois target is shot in the standing position, with the weapon resting on a stick. The stick should be standardised 2mtr long wit a diameter of 30mm.
- 4. The boar target is shot in the standing position straight arm or bended elbow, no weapon rest.

(Cf. Appendix 2 – game rifle shooting positions).

3.5 Turn-rounds

3.5.1 Game shotgun shooting (Game Compak® and Game Trench)

When shooting begins, five competitors must be ready, one at each shooting stand. The sixth competitor, at the waiting stand behind stand 1, he must be ready to take the place of competitor 1 once he/she has left the stand, etc. Shooter 1 must not load until the referee has given him/her permission to start shooting. The other shooters cannot close their loaded guns until the previous shooter has shot his/her clay target(s). In all cases, guns cannot be loaded unless pointing in the direction of the shooting zone.

When a competitor is ready to shoot, he/she calls "pull" or "go" for the clay target to be launched. After shooting, each competitor must wait until the following shooter has finished, before taking his/her place.

After shooting, shooters must not turn around on the shooting range before opening and unloading their guns.

Guns must not be handled when staff are in front of the shooting stands.

After shooting from stand five, the shooters, with their guns **open and unloaded**, must go to the waiting stand, behind stand one, immediately. After the shooting of the last clay target in a round, all the shooters must stay in their places until the last competitor has shot and the judging referee has called "shoot over".

3.5.2 Game Rifle shooting

After firing his/her round of five shots at the paper game target, each shooter must remain in position on the shooting range until the other shooters in the squad have finished firing their rounds of five shots at their respective targets.

3.6 Clay target shooting menu or order

3.6.1 Game shotgun shooting (Game Compak® and Game Trench)

Prior the beginning of each series, the trajectories must be presented to the shooters both in Game Compak and in Game Trench, in the order of the traps from left to right. If shooting is interrupted for more than ten minutes during a round because of a technical incident, the trajectories must be presented to the squad again.

Under no circumstances may guns be tested on the shooting stand before the start of the round.

Before the start of each Game Trench round, the referee must tell the puller, clearly and loudly, the number of shooters present in the squad, so that the scrambler can be positioned for the number given (six, five, four or three shooters). If shooting begins without the puller having correctly set the scrambler for the number of shooters in the squad, the shooters will not receive the same number of clay targets. **Upon realising such an occurrence, the referee must interrupt firing immediately.** The result of the already shot targets is accepted and the referee positions the counter at the correct number of shooters present(six, five, four or three) and shooting resumes at the point that it was interrupted.

The menu for each Game Compak® shooting stand must be displayed legibly before each shooter and the menu for all the stands must be displayed in large characters (visible to the referee and puller) between stations 3 (three) and 4 (four).

3.6.2 Game Rifle shooting

Depending on the installations, the first competition will be shot at the deer target, the second at the sitting fox target, the third at the motionless chamois target and the fourth at the boar or running boar.

3.7 Preparation time

3.7.1 Game shotgun shooting (Game Compak® and Game Trench)

Shooters must be ready to shoot immediately when called and must have the necessary equipment and ammunition with them to shoot the full round in 25 (twenty-five) minutes. Each shooter is given **ten seconds** to call for his/her clay target after the shot at the previous clay target. If the shooter fails to call within this period, he/she will be warned by the referee and then given another ten seconds to call for the clay target. If he/she fails to do so, the shotwill be counted "zero". Shooting takes place without other interruptions other than those scheduled in the programme or caused by technical difficulties, though in exceptional circumstances the referee may interrupt shooting if there is a sudden heavy shower or storm likely to be of short duration. The jury must be informed if this interruption persists.

3.7.2 Game Rifle shooting

Shooters must be ready to shoot immediately when called and must have the necessary equipment and ammunition with them to shoot the full series. Each shooter has 30 (thirty) minutes to shoot the series of four targets.

After the referee calls "cease firing", no shot are admitted. In case shooter shoots after this call first time the shooter gets a warning; second time, the best shot in the concerned target will be deleted; third time the shooter must leave the range. The referee must clearly announce, when 1 minute is remaining to shoot.

3.8 Launch time

3.8.1 Game shotgun shooting (Game Compak® and Game Trench)

Once a shooter has called for a clay target it must be launched immediately at the Game Trench and within three seconds at the Game Compak®.

3.8.2 Game Rifle shooting

The running boar target must appear within three seconds of the shooter's command.

3.9 Gun position

3.9.1 Game shotgun shooting (Game Compak® and Game Trench)

When waiting for the target(s), each shooter should be in the standing position on the shooting range, with the heel of the gun touching the body under a horizontal line marked on the shooter's jacket 25 cm below the middle of the shoulder axis (see sketch below), maintaining this lowered gun position until the clay target(s) appear(s).

In a double on report or simultaneous double, shooters may position their guns as they please between the first and second clay targets only. Once the clay target(s) appear(s), the shooter must fire with the gun shouldered.

During game shotgun shooting if a shooter takes up an improper position, i.e. not in accordance with Chapter 3.9 of these rules, or if he/she shoulders the gun before the target appears, a warning is issued and a yellow card is shown by the referee.

After the first warning, for any further occurrence on the same layout, the referee will show a Red card, the target(s) is/are declared:

- "zero" for a single target;
- "zero" and "No Bird" for a double on report;
- "zero" and "zero" for a simultaneous double.

3.9.2 System with 1st release trigger and 2nd pull trigger (release–pull trigger)

3.9.2.1 First shot – no bird

At first shot, in case of a "no-bird" target (announced by the referee), or for any other reason preventing the shooter from shooting, he/she must:

- Either keep the trigger pulled and call for a new target;
- or keep the trigger pulled and push the opening lever to the side in order to open the gun; for semi-automatic shotguns, apply the safety catch and pull the cocking handle to the rear twice to empty the chamber and magazine.
- or notify the referee, and fire the 1st shot in a safe direction indicated by the referee.

3.9.2.2 Second shot - no bird

After the shooter has fired his/her first shot and if the second target is "no bird": the shotgun can be opened.

3.9.3 System with double release trigger

3.9.3.1 First shot – no bird

Same process as at 3.9.2.1

3.9.3.2 Second shot - no bird

Same process as at 3.9.2.1

3.9.4 Running Boar

When waiting the target, the position has to be like indicated in previous point 3.9.1 but the shooter can shoulder the rifle on call.

4. WEAPONS AND AMMUNITION

4.1 Weapon characteristics

The weapons used must comply with the operative laws on weapons. They must be commercially available and not have been modified in whole or in part.

4.1.1 Shotguns

All smooth-barrelled shotguns with a minimum barrel length of 66cm and a maximum calibre of 12 gauges, sold via commercial outlets, are permitted except semi-automatic guns without a guide system for the ejection of empty cartridges.

Semi-automatic guns are authorised but they must be loaded with a **maximum of two** cartridges. They must be unloaded for each change of stand.

No advantage will be given to shooters using guns of a calibre below 12 gauges.

Any owner of a shotgun with a release trigger will affix, on the outer side of the buttstock, a sticker that sports a big "R" on a fluorescent background, as a warning:

If the law of the host country of an international competition prohibits the release trigger, this should be included in the competition program.

4.1.2 Game Rifles

Standard rifles that comply with the legal requirements of each country are accepted. Rifles must not weigh more than 5,000 grams (the weapon is weighed including scope, breech, magazine, and additional weight) and must have a minimum calibre of .22 Hornet. The use of additional weight on the barrel is permitted as long as it is fixed in position and used all through the whole competition. Additional weights must be properly attached, safe and cannot be adjusted. After the first round, a sticker / seal is placed over the barrel and the weight. Seals must not be removed or damaged. Any manipulation leads to disqualification. The use of hair trigger is permitted.

Rifles equipped with any kind of bipods, muzzle brakes, any perforation of the barrel and silencers are prohibited. Fluted barrel is admitted if commercially available on the concerned rifle model and not have been modified in whole or in part.

Adjustable stocks, full stocks and thumbhole stocks are permitted. Frame stocks and frame forehands are banned. No stock hooks are admitted.

The total length of the weapon should not exceed 125 cm.

Repeater and semi-automatic rifles must be used like one-shot rifles and be manuallyreloaded shot by shot. A 8 mm caliber will always be used to control the impact, regardlessof what caliber the shooter used. The scope magnification is free.

The control of the rifles (weight and length) takes place for each shooter immediately after each rifle series before leaving the shooting range. A controlled scale is provided by the organizer during the training days before the begining of the competition.

4.2 Straps and slings

Weapon straps and slings are banned.

4.3 Micro cameras

Any use of micro camera mounted on shotgun or on rifle is banned.

4.4 Modifying or replacing a weapon

Replacing a weapon, in whole or in part, a "mobilchoke" or a barrel is not permitted during the same round and not permitted between singles and doubles. Replacing a scope is not permitted during competition.

4.5 Malfunctions

In the event that a cartridge has not gone off or in the case of another malfunction of the gun or the cartridge, the shooter must remain at his stand, with the gun facing the shooting range, without opening it or touching the safety catch until the referee has checked the gun.

If the competitor in the case of a gun/cartridge malfunction, opens the gun him/herself or touches the safety catch, before the referee has checked the gun, the target(s) will be scored Zero.

A weapon must be considered as out of order if:

- it cannot be fired in complete safety;
- it does not ignite the power charge;
- the empty cartridge is not ejected because of a mechanical problem in a semi-automatic weapon:
- simultaneous percussion of both shots occurs.

In these cases, the shooter is entitled, without penalty, to shoot another target twice in the same round, without taking account of the change of gun. The third and following times that the gun does not work properly are considered as zeros.

The following incidents are not counted as malfunctions and the referee will record the score on the launched clay target:

- mishandling by the shooter;
- chamber(s) not loaded or loaded with empty cartridges;
- weapon in safety position.

In the event of *force majeure*, the shooter, with the referee's permission, may leave his/her squad and complete his/her round at a time specified by the referee or the jury.

4.6 Borrowing a weapon

If the referee judges that a shooting incident is not attributable to the shooter and that the weapon cannot be repaired quickly, the shooter may use another weapon with the referee's permission on condition that that the shooter obtains this weapon within three minutes of the gun being ruled out of order.

4.7 Sharing a weapon

Two shooters in the same squad may not use the same weapon.

4.8 Mistake in target

In case one shooter fires six shots in the same target, the worst five score must be counted as valid and the best one will be deleted.

In case the shooter A shoots in the target of his neighbour B, shooter A has no right to shoot more than 5 shots in total, and four shots will be counted as valid for the target A.

In order to evaluate the target of the shooter B (six holes on target), it will be proceeded as follows: if it is possible to identify the hole made by the shot fired by shooter A (different bullet diameter, therefore different hole diameter), this shot will be deleted; if is not possible to

identify this shot (same hole diameters), in this case will be counted as valid for the score of shooter B the five best shots and the worst one deleted.

4.9 Control of weapon

The shooter has the right to control his rifle and scope at any time during the competition, except during the execution of his round. For this effect, the organizer provides, at the shooters' disposal, a separate 100 m shooting range, for the control of rifles.

At any time the shooters remains responsible for his weapon and his ammunitions.

During the competition days, training is not allowed in the ranges where the competition is held.

4.10 Ammunition

Solely commercially manufactured ammunition for clay shooting is permitted. All dispersal devices or mixing shot of different diameters are banned. The use of black powder, tracer cartridges and reloaded cartridges in international game shotgun competitions is banned. Upon request of the jury, the referee may take a sample of ammunition to check them. Reloaded (self loaded) ammunition for rifle shooting is allowed.

4.10.1 Game shotgun shooting

Only shotgun ammunition in caliber 12/70 or smaller can be used. Cartridges must be charged with a maximum of 28 grams of lead shot, with a tolerance of +2%. Shot must be spherical, of a regular diameter of 2.0 to 2.5mm, with a tolerance of more or less 0.1mm.

During shotgun shooting when a shooting position is provided with a waste bin or a container for empty cartridges, the shooter is obliged to use it to dispose of theirs. The shooters using a semi-automatic shotgun are obliged, on leaving the stand, to gather their empty cartridges, and to dispose of them in the waste bin.

Not observing this rule will result in the usual penalties (yellow card / red card).

4.10.2 Game Rifle shooting

During rifle-shooting, shooters have to collect and remove their empty cartridge cases from their stand after they finished firing.

Not observing this rule will result in the usual penalties (yellow card / red card).

5. CLOTHING

5.1 Personal clothing

The shooter should preferably attend the shooting station dressed in hunting clothes and attend the opening ceremony with long trousers.

Shirts must at least have short sleeves, with or without a collar, but a crew necked tee-shirt or sweater at least must be worn. Shooters may not go bare-chested under their jackets.

Wearing sandals is forbidden for safety reasons.

Shooters must comply strictly with the above rules to take part in competitions.

Shooting gloves are permitted for shotgun events.

Gloves of any kind are not permitted for rifle shooting.

The use of clothing accessories such as pads, padded jackets, padding, belts and cushioning systems is banned.

5.2 Numbers

The shooter's competitor number must be attached to his/her upper back between shoulders and waist, be fully visible and worn in its entirety.

Failure to observe this rule is penalized by a first warning from the referee. Failure to rectify this requirement will lead to further penalties that may extend to exclusion from the competition by decision of the jury.

5.3 Protection

Ear protection is obligatory for everyone (shooters and accompanying persons in the vicinity of shooting ranges) for all events.

Eye protection is obligatory for everyone (shooters and accompanying persons in the vicinity of shooting ranges) for shotgun shooting.

5.4 Penalties

Any shooter which deviates the rules as per paragraph 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 5.1, 5.2, 5.3 will be penalized by a number of points according to the jury's decision.

If the jury believes that the deviation has been done with the aim of cheating, the whole series of shots will be counted as zero.

6. CONDUCT RULES

6.1 Safety

All shooting weapons, even unloaded, must be handled with the greatest care and on the sole responsibility of the user. Rifles must be carried open and unloaded. For weapons with fixed barrels (semi-automatic, repeaters, "Darne" system, etc), the breech must be open and the weapon carried with the muzzle pointing up or down.

When shooters are not using their weapons, they must place them vertically in a rifle rack or similar location.

Other shooters' weapons must not be touched without their permission.

Any shooter manipulating a loaded weapon without the referee's permission before the command "start firing" or after the command "cease firing" may be penalised by a **warning** and exclusion from the competition in the case of a repeat offence.

In the event of shooting being interrupted, the weapon must be immediately opened and must not be closed or reloaded before the shooting is resumed, with the permission of the judging referee.

Shooters and other persons in the immediate vicinity of the firing line must wear ear protectors or other suitable anti-noise protection.

6.2 Pretending to fire

No mock shooting is authorised on the shooting ranges or outside. Shooters are not permitted to aim or fire at other shooters' targets It is also forbidden to aim or fire knowingly at live animals. Shooters may be penalised for any accidental shot.

6.3 Shooter absent at the time of the call

Any shooter failing to appear before the referee before the first shot of the round has been shot by his/her squad after being called three times will be penalised by losing a round, so25 clay targets or 20 bullets.

Any shooter failing to attend or abandoning the competition without giving the jury a valid 01/01/2024

reason will be considered to have behaved in an unsportsmanlike manner. The disciplinary committee will rule on the penalty to be applied to the guilty shooter concerned at its following meeting.

6.4 Protests

If a shooter disagrees with the referee's decision on his/her shot, the protest must be made immediately by raising his/her hand and saying "Protest" or "Appeal". The referee must interrupt firing immediately and, after consulting the auxiliary referees, make his/her final decision known. Under no circumstances may a clay target be picked up to see whether it has been hit or not. Squad shooters are not entitled to intervene or express their opinions on the referee's rulings or decisions. Shooters may appeal to the jury to challenge the referee's decision. Appeals must be lodged in writing and be accompanied by a deposit determined by the jury before the competition, which is returned to the shooter if the protest is accepted by the jury, in which case the jury may instruct the referee to change his/her future decisions or appoint a new referee or, finally, modify the referee's decision. Appeals may not be made against a referee's decision in the following cases:

- Game shotgun shooting:
 - shot ruled "good" or "zero";
 - trajectory ruled correct or "no bird";
 - clay target launched within a period of time according to the rules.
- Game Rifle shooting:
 - judgement of a shot 10, 9 or ... zero.

ORGANISATION OF INTERNATIONAL COMPETITIONS

01/01/2024 20 / 31

7. PARTICIPATION

Shooters presented by national federations belonging to the Fitasc are entitled to take part in competitions. The shooters must have the same nationality as the federation they represent.

Each participant must be covered by civil liability insurance.

The names of the shooters and replacements must be known at least four weeks before the start of the competition. By entering a competition, shooters accept the rules and waive all legal arguments.

8. NATIONAL TEAMS AND INDIVIDUAL SHOOTERS

A national federation may present a national team formed by six shooters. Only the five best scores will count towards the team's result. If the national federation presents only five shooters in its team, all five scores will count. If a nation attends with fewer than five shooters, they will be classified as individual shooters.

The entry of individual shooters is free (open).

The full team must start at the same point for each competition round. The starting teams will be drawn at random by the organiser under the supervision of one or more delegated jury members.

Each federation will provide the organization with the name and reference (cell. number) of the Team Leader attending the competition or accompanying the team.

All entrants must take part in both types of competition, i.e.:

- shotgun: fifty Game Compak® clay targets and fifty Game Trench clay target targets;
- rifle: forty shots (two times twenty), i.e. five shots per paper game target (deer, fox, chamois and boar or running boar).

Number of points:

- rifle: four hundred points (forty ten-point shots);
- shotgun: four hundred points (one hundred four-point clay targets):
- individual maximum: eight hundred points;
- team maximum: four thousand points.

Each team member also competes for the individual ranking. Only the overall results for the best five shooters count for the team.

The winner in the category open (team and individual) is awarded the title of European or World Champion, solely for combined game shooting.

The following rankings will be established and announced in this order at the prize awards:

Individual

- Veterans
- Seniors
- Juniors
- Ladies
- Open (the shooter with the best result regardless his category man, lady, junior, senior or veteran)

National teams

 Open (Age categories able to qualify in a open National team: man, lady, junior, senior or veteran)

The following will also be awarded:

- at the world championship: world cups for game rifle shooting and game shotgun shooting, individually (open only) and on a team basis;
- at the European championship: European cups for game rifle shooting and game

01/01/2024 21/31

Championship	Title	National team	Individual shooter	Game Rifle shooting	Game shotgun shooting	Game Rifle shooting points	Game shotgun shooting points	Total points
World	World Combined Game Shooting Champion	Five shooters		200 bullets	500 clay targets	2,000	2,000	4,000

Grand Prix	Game Rifle shooting ranking		1	40 bullets		400		400
Grand Prix	Game shotgun shooting ranking		1		100 clay targets		400	400

9. JURY

International events are supervised by a jury consisting of a representative from each country that has entered a national team and chaired by the Chairman of the organising federation or his/her representative.

The jury can only rule validly in the presence of its Chairman or his/her delegate, accompanied 01/01/2024

by a quarter of the jury members. The jury makes decisions by a majority of the members present with the Chairman having a casting vote in the event of a split decision.

Each jury member must wear an identification badge supplied by the organiser.

The jury's role is:

- to check the referees' national/international licences and, if there are not enough referees, to choose competitors to act as additional referees on the recommendation of the representative of the national federation or the competition organiser;
- to ensure that the sporting rules are applied during shooting, including checking the weapons, ammunition and targets via technical tests;
- to respond to protests;
- to decide on the necessary penalties given to any shooters failing to observe the rules or behaving in an unsportsmanlike manner (Chapter 14).

The jury members and referees are responsible for checking, before shooting starts, that the installations comply with the specifications and that the preparations have been carried out properly and effectively.

In an emergency (e.g. risk of shooting being stopped for an extended period), two jury members appointed by the Chairman may make an exceptional decision with the referee's approval, subject to the jury's ratification of this decision.

The jury Chairman must ensure that there are always at least two jury members present at all the stands.

The jury may reduce the number of competition targets in the case of *force majeure*, in which case shooters may claim a refund for the clay targets not shot on the basis of the charge for a practice series.

An appeal jury will be created for each international competition to hear any challenges to jury decisions by shooters or by the Fitasc. The appeal jury will be formed by the Chairman of the Fitasc (or his/her representative), the Chairman of the technical commission (or his/her representative) and the Chairman of the jury (or his/her representative). The appeal jury is created at the same time as the jury.

10. ORGANISING COMMITTEE (SEE AGREEMENT)

The organising committee devises a procedure for drawing lots in agreement with the jury. The membership of the squads and the shooting order are drawn on the eve of the competition at a prearranged time so that the participating nations' delegates can be present. The squads are formed by six shooters (minimum of three for shoot-offs). Depending on the number of shooters, the jury may decide to form two groups of squads firing in the morningor afternoon, with a change-round every other day.

11. FEDERAL OFFICIAL (SEE AGREEMENT)

The federal official is the Chairman of the organising federation or his/her representative.

01/01/2024 23 / 31

12. REFEREES AND MARKERS

12.1 Referees

The officiating referees solemnly swear to:

- observe the rules and ensure that they are observed;
- make their decisions honestly and impartially;
- disregard their club and regional allegiances;
- remain close to the shooting range at a spot enabling them to judge observance of the rules under optimum conditions;
- announce their decisions clearly and loudly enough for shooters to hear them;
- listen attentively to shooter's complaints;
- have a copy of the up-to-date Combined Game Shooting rules on their person.

Shooting is overseen by the chief referee with current referee and federal licences, who signals clearly whether each clay target should be counted "good" or "zero". The results of shooting at paper game targets are announced by a referee in the shooter's presence, in premises set aside for this purpose.

The referee and his/her assistants, under the jury's supervision, apply the rules, ensure the safety of the public present and make sure that members of the public do not disturb the shooters.

With the jury members, the referees are responsible for checking, before shooting starts, that the installations comply with the specifications and that the preparations have been carried out properly and effectively.

The referees and other designated officials are responsible for giving the orders "start firing", "cease firing", "unload" and all other necessary instructions for the smooth running of the shoot. The judging referees also ensure that orders are followed and that guns are handled without danger.

Below the orders a referee must use in the rifle range:

- 1. referee calls the shooters by name and says their shooting position and target;
- 2. "PREPARATION TIME 1 MINUTE";
- 3. "LOAD WEAPONS";
- 4. "START FIRING"+ an audible whistle
- 5. 1 minutes before the end of the serie: "1 MINUTE"
- 6. end of one target "CEASE FIRING": "UNLOAD WEAPONS" + an audible long whistle
- 7. "NEXT TARGET IS..." (then the shooter can take the position to shoot next target, for example lie down in case of fox)
- 8. again orders 2-7
- 9. last target: again orders 2-6
- 10. "END OF ROUND".

In the case of technical difficulties: "STOP FIRING"; "UNLOAD WEAPONS".

The chief judging referee makes his/her decisions alone. Any auxiliary referee with a different opinion should raise his/her hand to inform the chief referee, who will then make the final decision, though the other auxiliary referees may be consulted first.

Squad shooters are not entitled to intervene or express their opinions on the referee's rulings or decisions.

Immediately after each rounds, the shooting results are examined and compared. If the marks do not correspond to each other, only those corresponding to the scoreboard arevalid. After this check, the round results are announced in a loud voice by the referee, so that all the shooters can hear them. Each shooter must check and sign his/her final result before leaving the shooting range. No complaints will be accepted after this formality.

01/01/2024 24 / 31

12.2 Markers / Assessors

12.2.1 Game shotgun shooting

On one game shotgun shooting range, the referee is assisted by three auxiliary referees provided by organization.

Referees must be in a position where they can observe the firing shooter and whole shooting zone the best. One assistant must be positioned near the scoreboard to record publicly the referee's decisions and inform the shooters.

12.2.2 Game Rifle shooting

The scores are established by the designated referees once the targets have been taken back to the premises provided for this purpose.

13. MARKING SHEET

Standard Fitasc marking sheets will be used (universal trench sheet for Game Trench and Compak® Sporting sheet for Game Compak®).

13.1 Game shotgun shooting

"Missed" clay targets are marked "O" and "good" clay targets marked "X" or "/" (cf. Appendix 5 – Game Compak® and Game Trench marking sheets).

13.2 Game Rifle shooting

Scores are recorded by an official referee on the targets and the total score is recorded on a marking sheet initialled by each shooter.

14. PENALTIES

All shooters taking part in competitions are deemed to be familiar with these rules and undertake to observe them. They agree in advance to accept sanctions and any other consequences of breaking the rules and disobeying referees' orders.

14.1 Penalties

If a shooter uses weapons or ammunition not complying with Articles 4.1, 4.2 and 4.9, all shots fired with such weapons or ammunition **will be considered as zero**.

Any shooter behaving in a manner considered dangerous by the referee may be excluded from the competition after a single warning.

If a shooter leaves his/her squad without a valid reason, i.e. without one of the reasons quoted in the present rules or without a reason accepted and approved by the referee, **allthe clay targets in his/her round remaining to be shot will be recorded as zero**. The referee will refer any repeat offence to the jury.

If the referee or a jury member realises that competitors are intentionally delaying the shoot or acting in an unsportsmanlike manner, the matter may be referred to the jury.

01/01/2024 25 / 31

15. SHOOT-OFFS

In the case of tied scores for the first 3 places, the ranking is established for teams and individual shooters as follows:

15.1 Teams

15.1.1 Combined Game Shooting

By taking the overall score of the tied teams and by counting back the installations in the following order: running boar, standing boar, Game Compak® 2.

15.1.2 Shotgun competition

By taking the overall score of the tied teams and by counting back the installations in the following order of the 4 series of shotgun shooting: Game Compak® 2, Game Compak® 1, Game Trench 2, Game Trench 1.

15.1.3 Rifle competition

By taking the overall score of the tied teams and by counting back the installations in the following order: running boar, standing boar, chamois 2, chamois 1, fox 2, fox 1, roe deer 2, roe deer 1.

Below third place in the ranking, teams finishing equal will be ranked as equals.

15.2 Individual

15.2.1 Combined Game Shooting

In the case of tied scores for one of the top three individual places for the competition, the shoot-offs for each round and category will take place over a complete round of Game Compak® and a complete boar series with a free arm. If the scores are tied, a new round will be shot on a Game Compak®. The first zero will eliminate the shooter provided that the shooters have had the same number of clay targets.

Shoot-offs take place in compliance with the rules above, though the empty places in the squad are not filled.

When the shoot-offs do not start at a time defined in advance, the shooters must remain in contact with the jury so that they are ready to shoot less than fifteen minutes after they are called. If they do not appear within this period, they will be deemed to have withdrawn.

Below the third place in the individual ranking, the tied shooters will be ranked as equals and presented in the ranking by counting back the installations in the following order: running boar, standing boar, Game Compak® 2.

15.2.2 Shotgun competition

By taking the overall score of the tied shooters and by counting back the installations in the following order of the 4 series of shotgun shooting: Game Compak® 2, Game Compak® 1, Game Trench 2, Game Trench 1.

15.2.3 Rifle competition

By taking the overall score of the tied shooters and by counting back the installations in the following order: running boar, standing boar, chamois 2, chamois 1, fox 2, fox 1, roe deer 2, roe deer 1.

Below third place in the ranking, tied shooters will be ranked as equals.

NB: Chamois 2, fox 2, roe deer 2 are targets included in the series of the running board. Chamois 1, fox 1, roe deer 1 are targets included in the series of the standing boar.

01/01/2024 26 / 31

16. GLOSSARY

Squad: Group of six shooters maximum drawn at random and shooting at the same

time on the same installations.

Round: A round comprises 25 clay targets shot or 20 bullets at four targets.

Trap: Machine or device for throwing targets.

Sonopull: Acoustic device whereby the Trap is triggered by the shooter's voice.

Shot: Corresponds to firing one cartridge.

Trench: Excavation at the front of the shooting range where the machines are

situated.

Clay Target: Clay target.

Trajectory: Line followed in space by a target.

Target: paper game target

01/01/2024 27 / 31

17. SCHEME EXAMPLES

17.1 On a Game Trench installation

Scheme 1								
Trap No.	Angle	Height at 10 metres	Length					
1	22° right	1.7 m	60 m					
2	12° right	2.2 m	55 m					
3	0°	2.5 m	60 m					
4	12° left	3.0 m	55 m					
5	22° left	3.5 m	60 m					
Scheme 2								
Trap No.	Angle	Height at 10 metres	Length					
1	28° right	3.5 m	55 m					
2	15° right	2.5 m	60 m					
3	0°	1.0 m	55 m					
4	15° left	2.5 m	60 m					
5	28° left	3.5 m	55 m					
Scheme 3								
Trap No.	Angle	Height at 10 metres	Length					
1	35° right	1.0 m	60 m					
2	22° right		55 m					
3	0°	3.5 m	60 m					
4	22° left	2.5 m	55 m					
5	35° left	1.0 m	60 m					

17.2 On a Game Compak® installation

Example of a menu for a round (3 singles and 1 double):

Stand 1	Stand 2	Stand 3	Stand 4	Stand 5
